Technical Data
Hand Vac PV1405A

Voltage V 14.4
Run time (approximate) mins. Low: 12
High: 10
Power jar watt W 304
Maximum suction power mm/water 577
Maximum airflow m3/hr 1306
Dust bowl capacity ml 350
Net weight kg 1.7

Intended Use
Your Black & Decker Dustbuster® hand held vacuum cleaner has been designed for light dry vacuum cleaning purposes. This product is intended for domestic use only.

Warning Symbols

Δ Denotes risk of personal injury, loss of life or damage to the product in case of non-observance of the instructions in this manual.

Safety Instructions

Δ Warning! When using battery-powered appliances, basic safety precautions, including the following, should always be followed, to reduce the risk of fire, leaking batteries, personal injury and material damage.

Read this entire manual carefully before using the appliance.

The intended use is described in this manual. The use of any accessory or attachment or the performance of any operation with this appliance other than those recommended in this instruction manual may present a risk of personal injury.

Do not use this manual for future reference.

Use Your Appliance

Do not place bowl/ inlet or outlet of your vac near eyes or ears when operating.

Avoid dry materials only. Do not expose your vac to rain.

Do not operate without the filter bag in place. Repair or replace a damaged bag promptly.

Do not overheat. Use extra caution when cleaning on stairs. Keep proper floor/ balance of all times.

Do not vacuum burning or smoking materials, such as cigarettes, butts, matches or hot ashes.

Do not operate portable electric tools in a gaseous or explosive atmosphere. Motors in these tools normally spark, and the sparks may ignite sparks or dust.

Do not use your appliance to pick up toxic substances, flammable or explosive or combustible liquids such as gasoline or use in areas where they may be present.

Do not allow to be used as a toy. Close attention is necessary when used by or near children.

Use only as described in this manual. Use only manufacturer’s recommended attachments.

If the vac is not working as it should, has been dropped, damaged, left open to the elements, or has been submerged in water, return it to a service center.

Do not put any object into openings. Do not use with any opening blocked; keep free of dust, lint, hair and everything that may reduce airflow.

Keep hair, loose clothing, fingers, and all parts of your body away from openings and moving parts.

Do not handle charger or appliance with wet hands.

Never pull the charger lead to disconnect the charger from the socket. Keep the charger lead away from heat, oil and sharp edges.

After Use

• Do not insert accessories when the unit is running.

Inspection and Repairs

• Before use, check the appliance for damaged or defective parts. Check for: a) signs of damage to switches and any other conditions that may affect its operation. Do not use the appliance if any part is damaged or defective.

Battery and Charger

• Never attempt to open the battery or charger.

Double Insulation

The charger of this appliance is double insulated. Double insulation means that all the external metal parts are electrically insulated from the mains power supply. This is done to prevent contacting between the electrical and mechanical components so as to make unnecessary for the tool to be earthed. Note: Double insulation does not take the place of normal safety precautions when operating the tool. The insulation system is for protection against injury resulting from a possible electrical insulation failure within the tool.

Electrical Safety

The electric motor has been designed for one voltage only. Always check that the power supply corresponds to the voltage on the rating plate. Never attempt to replace the charger unit with a regular mains plug.

Symbols on the Charger

Read all of the symbols on the charger:

Your charger is double insulated, therefore no earth wire is required.

Fail safe isolating transformer. The mains supply is electrically separated from the transformer output.

The charger automatically shuts off if the ambient temperature becomes too high. As soon as the ambient temperature has decreased, the charger will resume operation.

The charger is intended for indoor use only.

Read the manual carefully before using the appliance.

Features (Fig. A)

1. Release latch for container door
2. Two speed on/off switch
3. Collector lock button
4. Filter cleaning wheel
5. Two-speed indicator
6. Charging base
7. Dust collector extension
8. Upholstery brush (stored in underside of appliance)

Installation

Fitting The Charging Base To The Wall (Fig. B)

This charging base (7) can be placed on a worktop or fitted to the wall to provide a convenient storage and charging point for the appliance.Where the wall is made of tile, make sure that the fixing method is suitable for the wall type and is appropriate to the weight of the appliance.

Adjusting The Dust Collector (Fig. C & D)

The dust collector (8) is stored under the appliance. To adjust for use, lift the appliance from the charging base.

Press the collector lock button (3) and rotate the dust collector to the required position.

Release the collector lock button to lock the dust collector in position.

The dust collector can be extended by pressing the button (11) and pulling the extension back into the dust collector.

Transport the appliance on the handle should be returned to the storage position under the appliance after use and while charging the appliance.

Fitting & Removing The Accessories (Fig. E)

Assembly of the appliance is stored under the appliance. To attach for use, lift the appliance from the charging base.

Press the accessory lock button (5) and rotate the dust collector to the required position.

Remove the accessory lock button to release the accessory in position.

To remove the accessory, simply pull it out from the dust collector and put it back to the holder.

Use

Before first use, the battery must be charged for at least 16 hours.

Charging The Battery (Fig. F)

• Make sure that the appliance is switched off. The battery will not be charged with the on/off switch in this position.

• Plug in the charger. Switch on the mains. The charging indicator (9) will light. Leave the appliance to charge for at least 16 hours.

• While charging, the charger may become warm. This is normal and does not indicate a problem. The appliance can be left connected to the charger indefinitely. The charger extends to be as large as the appliance is connected to plugged in charger.

Warning! Do not charge the battery at ambient temperatures below 4°C or above 40°C.

Switching On And Off (Fig. G)

• To switch the appliance on, slide the on/off switch (4) forward to position 1.

• For full power, slide the on/off switch (4) forward to position 2.

• To switch the appliance off, slide the on/off switch (4) back to position 0.

Optimizing The Suction Force (Fig. H)

• In order to keep the suction force optimized, the filters must be cleaned regularly during use.

• Rotate the wheel (5) a few turns to shake out dust clogging the filters (12 & 13).

Fitting the floor extension adapter kit

• Prior to assembly, make sure the unit nozzle is to be cleaned to positioning (5).

• Connect the floor extension adapters (Fig. N).

Fitting the storage clip

Floor extension adapter can be stored on charger with floor extension storage clip (Fig. G).

• To fit the storage clip, hang the hook (a) onto the top of charger base(s).

• Insert the catch (g) into the hole (h) to firmly seat.

• Clip the extension poles for compact storage.

Hard floor mode/ carpet mode selector (Fig. P)

• To select the hard floor mode, flip down the right side of selector (a).

• To select the carpet mode, flip down the left side of selector (a).

Maintenance

Warning! Regularly clean the filters (12 & 13).

Cleaning The Dust Container and Filters (Fig. I-L)

The filters are re-usable and should be cleaned regularly.

• Press the release latch (1) and open the container lid (2) (Fig. I).

• Empty the dust container (3).

• Remove the filters (12 & 13) by holding the container mouth (Fig. K).

• Brush any loose dust off the filters.

• Rinse the filters in warm, soapy water (Fig. L).

• Make sure that the filters are dry.

• Re-insert the filters (12 & 13) into the appliance, twisting them clockwise until they lock into place.

• Close the container lid (2). Make sure that the release latch (1) clicks into place.

Warning! Never use the appliance without the filters. Optimum dust collection will only be achieved with clean filters.

Replacing The Filters

The filters should be replaced every 6 to 9 months and whenever worn or damaged. Replacement filters are available from your Black & Decker dealer (part no. PV1005).

• Remove the old filters as described above.

• Fit the new filters as described above.

Trouble Shooting Guide

If the product does not work, check the following:

• The power supply plug was correctly plugged in for recharge (it feels slightly warm to the touch).

• The power supply plug is not damaged and is correctly attached to the appliance.

• The power supply plug into a working electrical outlet.

Protecting The Environment

Separate collection: This product must not be disposed of with normal household waste.

Should you find any that your Black & Decker product needs replacement, or if it is no further use to you, do not dispose of it with household waste. Make this product available for separate collection.

Separate collection of used products and packaging materials to be separated and used again. Re-use and recycling materials helps prevent environmental pollution and reduces the demand for raw materials.
